

Dura Tap™ Industrial Test Sieve Shaker for 8" and 12" Test Sieves

Built to Take a Beating

Answering the call for a heavy-duty industrial test sieve shaker, Advantech proudly offers the DuraTap™. With your requirements and budget in mind, this unit is designed to succeed where others fail. Gone are the days of needing to buy "accessory packs" of repair parts for expected breakdowns like other sieve shakers require. The DuraTap™ doesn't use typical plastic and wear-surface parts. This industrial-strength unit is engineered with rugged steel and alloy materials ready to withstand the everyday, harsh duty cycles. Grease fittings are provided to ensure longer life for your bearings. Each unit is "burned in" by continuously running it for over 4 hours, guaranteeing performance right out of the box. Our large inventory allows this unit to ship the same day your order is placed.

Specifications:

Capacity

8" Diameter (203.2 mm) or (200 mm) Sieves:

Product specifications are subject to change without notice.

Conversion Kits for the DuraTap™

Kits are available for customers who want to convert their existing unit to accept either 8" or 12" sieves. No need to incur the expense of another shaker. Simply unscrew 4 bolts and loosen 2 hex nuts.

- PA8 - converts your 12" unit to accept 8" sieves.
- PA12 - converts your 8" unit to accept 12" sieves.
