KINEMATICA is the leading manufacturer of homogenizing, mixing and milling equipment based on our technology of rotor/stator dispersing principles.

With the new designed POLYMIX® System PX-MFC 90 D KINEMATICA presents now the successor of the famous POLYTRON® System PX-MFC - Culatti Micro Hammer Mill.

The new PX-MFC 90 D is suitable for all dry milling applications in the lab and is designed with many new features: a more powerful motor, an integrated frequency inverter with LED-display, a new designed milling chamber with exchangeable grinding attachments, a new base frame with integrated handle and much more.

Special features of the PX-MFC 90 D:

- 500% more power (1000 W, 3-phase motor) than former model PX-MFC
- Speeds up to 6'000 rpm
- Low noise level due to brushless 3-phase AC motor
- Integrated speed control with LED-display for speed indication and status messages
- Integrated overheating, overload and blocking protection
- Safety switch for automatic-Off
- Energy saving through automatic Standby-mode
- Milling chamber with attached funnel and rotary slide for product inlet dosage; intercepting tubes and NS29 vessels can be attached to milling chamber outlet
- Milling chamber can be equipped with hammer grinding or blade grinding attachment
- Milling chamber can be equipped with sieves in different mesh sizes from 0.2 up to 6 mm
- Milling chamber parts in contact with the product made from stainless steel hardened
- Base frame made from anodised aluminium with integrated handle
